

Team Athena Vision

The Athena team recognizes our students as capable and unique learners. We believe in their numerous abilities and talents, and we are committed to helping them identify and develop their talents through a student centered environment. Student voice drives our curriculum and instruction. We embrace our student's energy and enthusiasm. Their ideas, needs, and interests are at the heart of our teaching and their learning.

Through our student-centered approach, each team member will be challenged individually, while sharing in the benefits of our team's community. We believe each learner can succeed in our standards and project based classrooms.

We value our students' connections to the numerous communities they are a part of, including the team, the school, their families, and Milton town. Our curriculum develops student awareness of and participation in these relationships.

The Athena team provides a respectful environment for all team members through recognition of individual voices and learning styles. We believe in a shared responsibility to preserve this environment. With this vision in place, Athenians will be responsible, proud citizens who care for each other, their belongings, and their surroundings. We believe this vision imparts the necessary qualities and skills within our students to emerge from our team as happy, lifelong learners.
